SPECIAL TRAINING

OSHA 40-hour Hazardous Waste

US Army Corps of Engineers
Construction Quality Management for
Contractors Training

REPRESENTATIVE EXPERIENCE

Ms. Piekarski is an experienced multi-media environmental compliance auditor who has performed due diligence audits for small and large industrial facilities. She has also prepared and updated facility Spill Prevention, Control, and Countermeasure (SPCC) plans in accordance with applicable state and federal regulations. Ms. Piekarski has conducted numerous environmental compliance audits for colleges and universities and the United State Postal Service in Connecticut, Maine, Massachusetts, New Hampshire, and New York.

Ms. Piekarski is also responsible for the management of soil and groundwater hazardous waste and petroleum release remediation projects. In addition to requiring a working knowledge of state and federal solid waste, underground storage tank, aboveground storage tank, petroleum, and hazardous waste regulations, these projects frequently require the development of technical specifications and contract documentations, consistent with local, state and federal requirements.

Ms. Piekarski's professional experiences with Aries and other environmental engineering and consulting firms includes;

- Performing multi-media environmental compliance audits (MECAs) for industrial, public and federal clients.
- Preparing comprehensive environmental compliance audit reports;
- Conducting soil and groundwater contamination assessments;
- Development and management of subsurface soil, groundwater and indoor air monitoring programs;
- Management of underground storage tank decommissioning activities;
- Development and implementation of Remedial Action Plans (RAPs);
- Managing field sampling programs;
- Site health and safety office for Superfund sites; and
- Primary author of health and safety plans, task work plans, sampling and analysis plans, and project completion reports.
